Dear Team,

Please find the attached report for C-DOT snapvault relation's which have lag more than 24H.

This tool scan all the C-DOT filer's managed by C-DOT DFM server's for any snapvault relation's which have lag more than 24H.

Please Consider below notes

1) This tool looks for a ignore list which is /filers/admin/scripts/conf/C-DOT-MISS-Lag. Any entry on this file will be ignored

2) Presently this tool collect data from Eagan CDOT DFM server's

3) Please verify you have standard snapmirror policy on snapvault destination

4) Check with DBA team for oradata volume's if no snapshots are taken or No new data

5) Add in ignore list if there is a valid reason after consulting with your lead's

6) Troubleshoot snapvault issues per our standard if its missed during provision / Migration time.

Thanks
